

Global Rock-Solid Connectivity

Article by Ifeanyi O. Asonye

What we do at Globrocks... Is Simple: "Connecting Global Business and Technology".

Globrocks is committed to quality Information Technology Solutions and Services, to connect the most optimized and reliable collaborative computer-mediated business communication systems, networks and converged personal computer systems at the lowest cost in the industry.

'Rock-Solid Connectivity' is the IT-Level customer focused and oriented Solution and Service using new ERA, reliable and cost-efficient technologies to provide secure and reliable global connectivity, electronic communication systems, wired and wireless networks for small, mid-sized and enterprise businesses.

'Rock-Solid Connectivity' is precisely about **"Connecting Business and Technology"**; enabling and helping every business and individual to access Global Business Work and Play securely, Anytime, Anywhere, from any device at the lowest cost in the industry using the **Globrocks New ERA StakeHolders Solutions, Consultative Biz Approach (CBA) and Consultative Digital Approach (CDA)**. **Globrocks NEW ERA approach involve 'Facilitating + Connecting Businesses, and Building Elite Teams based on Organizational Visions, Missions, Values and Goals, and for lasting InterDependent Partnerships, Mergers and Acquisitions'**

We transform the Technology into a Global Business Solution.

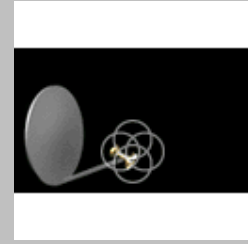

Globrocks will minimize your Total Cost of Ownership (TCO), maximize your Returns On Technology Investments (ROI) while applying top-notch Total Quality Management (TQM) practices. Our Solutions and Services offering help our customers to achieve an outstanding Global Computer and Network System reliability and high availability. Our customers retain the quality services we offer at an affordable rate, which in turn enable us to offer **high quality services** competitively.

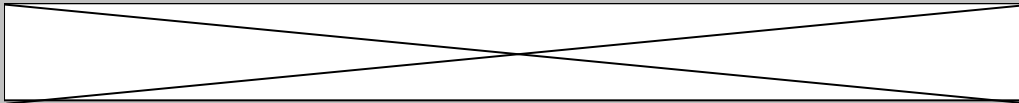

"Globrocks Now
Transforming
Technology into
Business Solution"

"We Prioritize, and We
Ensure High Return On
Technology Investments"

"Globrocks Offering
...Reliable Business
Technology
Connectivity"

We EXECUTE the Show...

Several **innovations** and technological breakthrough continue into the new ERA, with many **new capabilities** built, many of which happened **unnoticed** in the Information Technology area within the last 2 - 5 years than we realize.

There's much more simplicity, compatibility, reliability and several **Flexible Competitive** products, and **Service** offerings available to individuals and businesses. **Globrocks bring all of these good things to you and your business. Globrocks will reduce your consulting overhead costs and accelerate solution deployments**, while reducing project risks using **New ERA** and **Efficient, Strong** and **Reliable, Affordable** and **Cutting-Edge Technologies** implemented by **Skilled TALENTS-Strengths** and **Experienced IT Specialists optimized for your computing needs.**

Quality **is our Character** with **Passion for the Technology**. Our focus is what **our customers really need, and they must be feasible, and affordable**. We thirst to learn things that are important and to offer solutions **that will be of great benefit to you as an individual, your Team and to your Business**. All of these will show in the way we do things at Globrocks; **the quality of our work is a product of our Values** which reflects the way we **think**, the things that we **believe in**.

We offer **strategic enterprise project management** and network integration solutions and services **best fit the needs** of your business and organization by working closely with you and your Teams to understand the nature of your business, business processes, **pain points and mission critical areas**. We consider solutions and decisions that will help you to minimize your systems administration time and **maximize your overall productivity**.

Globrocks has a unique **computer networking** and **technology solutions and services, network consulting** and **training**.

We may work from just about AnyWhere, we may fill in till you can hire somebody permanently. In terms of Skill set, our Business Technology Consultants, Project Managers, Trainers and Network Services Consultants are experienced and highly competent Microsoft Certified Systems Engineers, Microsoft Certified System Engineer + Internet, CISCO Certified Infrastructure Specialists, IT Training Specialists and CompTia A+ Certified Hardware Integrators.

Globrocks Business Technology Solutions and recommendations must meet stringent **Total Quality Management (TQM)**. **It's a Solid Globrocks Business IT Management Strategy that integrates quality practices in all aspects of organizational processes implemented and maintained** affordably, it must **in addition, maximize Returns on Technology Investments**. We are constantly looking for new opportunities and challenging projects to make a DIFFERENCE.
